**Fire Blocking Gel**

**SAVE YOUR WORLD**

**ATAK PAK SYSTEM**

The Barricade Atak Pak uses a soft canvas backpack and a specially engineered eductor/nozzle assembly to provide today's firefighters with an exciting new tool for fire suppression and exposure protection. The Atak Pak is an end of the line application system that allows for flexibility, mobility and rapid deployment. The Barricade Atak Pak easily adapts to any size fire hose and it can carry up to 19 litres of Barricade concentrate. The Atak Pak gives the firefighter the option of spraying Barricade Gel or using plain water.

The Atak Pak can be used either with the 11.4 litre/min home defence nozzle or the 56.8 litre/min Quik Atak nozzle for larger area application. When used with the Quik Atak nozzle, an optional adjustable gel inductor is available that allows the user to "dial up" the gel concentration for fire break use or for exposure protection. Other larger capacity nozzles are available on special request.
